

## **Materials Technologist, Paragon Systems (Concord, ON)**

Paragon Systems is a leading provider of product development and testing services for the manufacturing sector. We've earned a reputation for leadership in the product development business.

We are currently seeking to hire an entry-level materials technologist who enjoys collaborating within a talented and energetic testing group. In this position, you will be involved in specimen preparation, metallurgical and materials evaluation and testing on a wide variety of manufactured products including automotive parts.

We need a highly motivated materials technologist from a materials science background with a good knowledge and experience in one or more of the following areas:

### **Test Specialist Required Skills:**

1. Undergraduate degree in materials science and engineering
2. Good knowledge of metallurgical preparation and test methods.
3. Good mechanical aptitude
4. Proficient with MS Office suite of software.

### **Job Description:**

1. Perform preparation and metallurgical testing of metal and plastic materials
2. Work with testing team to apply climactic and mechanical testing procedures to client products.
3. Report preparation.
4. Test lab maintenance.

The position does not require directly related experience but an undergraduate degree in materials science and engineering would be an asset. Training will be provided. Compensation is competitive and based upon candidate's experience. To qualify, applicants should meet the minimum requirements listed in the job description.

Qualified candidates should send their CVs to Mr. Bruce Yao, Test Manager, at [brucey@paragonsystems.ca](mailto:brucey@paragonsystems.ca). We thank all applicants in advance for your submission, but only qualified candidates will be contacted for consideration.
